PROFILE

Software engineer with experience in web development, process automation, and DevOps practices. My work focuses on designing, building, and maintaining robust and scalable solutions, applying engineering principles, clean architecture, and quality best practices. I have an analytical and results-oriented approach, which allows me to tackle complex problems with technical clarity and judgment.

I have experience in frontend and backend environments, as well as in systems integration, automated deployments, and observability tools. I stand out for my ability to understand business needs, propose efficient solutions, and collaborate with multidisciplinary teams using agile methodologies. I maintain a mindset of continuous improvement, professional communication, and a commitment to developing reliable, secure, and maintainable software.

WORK EXPERIENCE

DEVOPS - AUTOMATION ENGINEER

Oct 2024 - NOW

- I work directly with servers.
- Implementation of CI/CD pipelines in Azure DevOps and deployment process in AWS ASG systems. This is done by creating lambdas with Python.
- Automation of internal processes using RPA and automated testing with Selenium and Appium.
- Use of tools such as Azure Workspace, Docker, Postman, and environment management for testing and deployment.
- Use of APIs and chatgpt for code analysis and work on new developments.

Internship

Jul 2022- 2024

- During my professional internship, I gained comprehensive experience in full-stack and backend software development, participating in real projects within three companies in the technology sector. My longest tenure was at Rhiss, where I consolidated most of my skills.
- **Rhiss – Intern (2023 – Oct 2024)** I worked as a full-stack developer, collaborating with the development team on building and maintaining applications using PHP, JavaScript, Laravel, MySQL, and Flutter. I participated in module development, bug fixing, performance improvements, and critical functionality support.
- **Qsofting – Intern (2022)** I collaborated as a Software Developer for 3 months, supporting web development with technologies such as PHP, Vue.js, JavaScript, and TypeScript. I implemented components, API calls, and interface optimization.
- **AtlanticSoft – Intern (2022)** I worked as a Backend Developer for 3 months on projects based on AWS, Python, Docker, and FastAPI. I participated in the creation of backend services, containerization with Docker, and technical documentation.

EDUCATION

Von Humboldt University - Undergraduate

2021 - 2025

software engineer

Universidad de los Andes - Master's degree

2025-2027

Master's degree in artificial intelligence.

Machine Learning model design, training, and evaluation

Statistical analysis and data modeling

Deep Learning fundamentals and neural networks

Big Data processing and data pipeline architecture

Feature engineering and data preprocessing techniques

Model optimization and hyperparameter tuning

AI applied to environmental and real-world research contexts

Data visualization and storytelling for decision-making

Investigation - ML: Currently engaged in a research process focused on the analysis of bioindicator species in Colombia (insects and amphibians) through the application of Machine Learning, Data Engineering, and Advanced Analytics methodologies.

My work involves the design and implementation of ETL pipelines for the extraction, transformation, and integration of climatic and biological datasets obtained from public and institutional sources. I perform exploratory data analysis (EDA) to identify environmental patterns, correlations, and anomalies that may influence species distribution and ecosystem health.

I apply supervised and unsupervised Machine Learning models for classification, clustering, and predictive analysis, leveraging tools such as Python, Pandas, Scikit-learn, and visualization libraries to interpret results and support ecological insights.

CERTIFICATIONS AND SKILLS

- Diploma: STRATEGIC TRANSFORMATION - LEADING ORGANIZATIONAL CHANGE

ADDITIONAL INFORMATION

- **Languages:** Spanish (native), English (B2)
- **Frameworks:** Laravel, VueJS, FASTAPI
- **Languages:** PHP, JavaScript, Python, SQL
- **Databases:** MongoDB, Spark, MySQL
- Data And ML: Tensorflow, python, ETL,
- **DevOps & QA:** Azure DevOps, Docker, Appium, Selenium, Postman, AppSmith, AWS, jmeter
- **Methodologies:** SCRUM, Agile
- **Other:** Process automation, automated testing, CI/CD
